Lotus Lake International School is a pioneering online school in India that provides students with an immersive, interactive, and engaging learning experience. We offer free, top-notch education regardless of the situation or location. Speak with one of our counsellors to determine if our school is the best fit for your kid. Both our instructors and students are from various countries.

ACT MORE. STUDY MORE. BE MORE.

Easy access

Skill-based
education

We are a school that understands the problems of changing times and provides solutions, whether it is personalised learning to fit the needs of students, trained faculty to keep up with the new trends in education or going beyond the syllabus to conduct special classes, capstone courses and electives.

Your Child's Future is Our Priority

Every child is endowed with a special talent that makes them stand out. At Lotus Lake International School, we put a child's education first, but we also give them the time and support they need to explore all of life's possibilities and "Be More."

What Sets Us Apart

We are a formal, accredited institution that provides students in India and abroad between the ages of 3 and 18 with access to Indian, American, and British curricula online. With over 3000 students and 225 teachers, our community has grown significantly since its founding in June 2022. We are leaders in providing students with individualized, open, reasonably priced, high-quality education online through the use of a unique learning platform that exposes students to a library of the best in the world's audio, video, and animated curriculum materials.

The 3R's – Reading, Writing and Arithmetic are the basic skills taught in schools; although just those are no longer sufficient, and neither is a cursory knowledge of facts, as we have learned at Lotus Lake International School. What is required is a deeper understanding of the material through its use in resolving practical problems. The deliberate development of critical abilities (problem-solving, creativity, communication, collaboration), as well as universal human values, must be added to complement content knowledge (empathy, positivity, equanimity, and the ethic of excellence).

Values & Ethics

Personalized Education at your fingertips from the comfort of your home. For the stakeholders, Lotus Lake wants to reimagine the school experience. We work hard to make everyone's 16 years of schooling worthwhile and enjoyable.

An expandable model worth experimenting with in different contexts.

"The change I have seen in my child is phenomenal.

He want to explore more about topics taught in school!"

- Dhanush's Mom

LEARNING CULTURE

Grounded in a tradition of teaching excellence, Lotus Lake International School puts the students first at all times. At Lotus Lake International School, we intend to build a culture of openness and genuine education that enables children to discover and celebrate the joy of learning

The emphasis at Lotus Lake School is on putting learners' implicit knowledge of life in their minds. We promote openness in learning, as well as encourage and share customized learning modules with the flexibility to complete them at your own pace. There will be open communication between the teacher and the students.

Learning by
